

### KL/A

Duct air quality sensor for mixed gas (VOC)

Measuring size: VOC

Output: 0-10 V, 4-20 mA, Relay

Highlights: easy to install with included mounting flange

#### Description

The KL/A mixed gas sensor registers the air quality in the range of 0...100% with respect to the calibration gas and converts this measured value into a linear output signal 0-10 V respectively 4-20 mA.

As an option the air quality sensor has a potential-free changeover contact and a backlit display. The display content can be rotated in 90° steps using a menu and the measured value, the switching threshold set, the state of the relay, the MIN/MAX measured values for the selected intervals (1 h / 6 h / 12 h / 24 h) etc. can be read out.

The sensitivity can be set on the device at ?low?, ?medium? and ?high?.

The air quality that is defined as normal for the environment can be specified on initial start-up by manual calibration on the device (zero point balance). The air quality sensor performs an automatic calibration at regular intervals, long-term drifts and the operational wear of the sensor element are thus totally eliminated.

# **Technical Specifications**

| Measurement range VOC   | 0-100% (good / bad air quality, referring to the calibration gas)                      |  |  |
|---|--|--|--|
| Accuracy  | ±15% FS  |  |  |
| Running-in time   | 1 h  |  |  |
| Response time (t90)   | max. 60 s  |  |  |
| Long term stability   | < 15% FS/year at norm load   |  |  |
| Sensor  | metal oxide VOC-sensor   |  |  |
| Sensor protection   | screwable stainless steel sinter filter  |  |  |
| Supply voltage  | 24 V AC/DC (±5%)   |  |  |
| Current consumption   | max. 60 mA   |  |  |
| Analogue output 0-10 V  | 3-wire connection, min. load resistance 100 kOhm                                       |  |  |
| Analogue output 4-20 mA   | 3-wire connection, max. RLoad(Ohm) = (+Ub - 15 V) / 0,02 A                             |  |  |
| Alarm output  | 1 x potential-free change-over contact, 48 V, 1 A                                      |  |  |
| Switching Hysteresis Relay  | 2% FS (without Display), 0,55% FS adjustable (with Display)                            |  |  |
| Electrical connection   | screw terminals max. 1,5 mm <sup>2</sup>   |  |  |
| Housing   | Polycarbonate PC UL 94 V0 with hinge locks, color signal white similar to RAL 9003     |  |  |
| Cable gland   | PG11 high-strength cable gland with strain relief                                      |  |  |
| Display   | optional LCD display with backlight on/off/auto  |  |  |
| Material  | Protection tube: metal   |  |  |
| Dimensions  | Housing: L 89 x W 80 x H 47 mm, Protection tube: Ø 16 x 190 mm                         |  |  |
| Weight  | 250 g  |  |  |
| Protection type   | Housing/electronic: IP65, Sensor: IP30   |  |  |
| Protection class  | III  |  |  |
| Working range r.H.  | 098% r.H. in contaminant-free, non-condensing air                                      |  |  |
| Working temperature   | 0+50°C   |  |  |
| Storage temperature   | -20+50°C   |  |  |
| itial operation After switch-on of the device follows a self-test and the tempering, which ta |  |  |  |
|   | h depending on the environmental conditions. At this time the analogue output drifts   |  |  |
|   | from the actual measurement value.   |  |  |
| Automatic calibration   | The automatic VOC calibration takes place every 7 days, this compensates for any       |  |  |
|   | drifts and achieves excellent long-term stability. To ensure this function, the device |  |  |
|   | must be supplied with power for at least 7 days without interruption and ventilated    |  |  |
|   | with fresh air once for approx. 10 minutes within this period.                         |  |  |
|   | The automatic calibration can be deactivated if necessary and performed manually.      |  |  |
| Manual calibration  | The manual VOC calibration of the output signal to 1V (zero point) is started by       |  |  |
|   | pressing the button on the circuit board (hold down for approx. 5 seconds until the    |  |  |
|   | LED flashes). Before that, continuous operation of min. 2 hours with air defined as    |  |  |
|   | normal air quality. The LED is deactivated after successful calibration.               |  |  |
| Installation  | mounting flange (in scope of delivery)   |  |  |
| Approvals   | CE, EAC, RoHS  |  |  |
|   | ·  |  |  |
