

OF7/E

Surface Temperature Sensor - Magnetic with Glass Fibre/Stainless Steel Netting

Measuring size: temperature

Output: passive sensor

Highlights: three holding magnets - holding force 45N

Description

The magnetic OF7/E surfaces sensor measures the temperature of metallic surfaces in the range of -30 up to +400°C and is with PT100 / PT1000 sensors available. By the three holding magnets the temperature sensor can be mounted fast and safe directly.
